Victorian Railways VTGX Liquefied Gas Tank Wagon

for Microsoft Train Simulator Jun, 2003

Copyright Central Victorian Workshops

Russell Beer *All rights reserved*

This is a model of a Victorian Railways VTGX Liquefied Gas Tank Wagon used to carry Liquefied gasses such as LPG and anhydrous ammonia from the Refineries to wholesale distributors throughout Australia. This wagon is suitable for bogie exchange and would have been seen on the broad gauge and standard gauge networks.

Max Speed 80 Kph (50 Mph)

Many Thanks to Teemu Saukkonen for 7bogies and Nick Lapthorne for sourcing the photos for the textures.

Unzip and install then add the wagon to a consist.

This car has a higher polygon count than the cars supplied with MSTS and so may impact frame rates on your machine - especially if used in quantity in your consists.

Freeware, trade, copy and Reskin at your leisure. The only conditions I place are DON'T SELL THESE MODELS via any medium and they are NOT to be hosted on any website without my permission!Break these conditions and I will set the copywrite dogs on you!!!These wagons and textures remain the copywrite of © Russell Beer and the CVW workshops.

The models contained within this package are stable and shouldn't create any problems with your MSTS install, PC or Life, BUT if they do I am not to be held responsible, by installing this package you hereby signify to agree to these terms!
