Contents:
1. Model details
2. Registration
3. Installation Notes
4. Copyright, Distribution and Terms of Use

---

1. Model Details

- 3D Model created with Abacus TrainSim Modeler Commercial by Russell Beer.
  Textures created with Adobe Photoshop CS by Russell Beer
  Physics by Ian Bowles
  Additional 5-pack sets textured and arranged by Steve Molloy
  Package and installer by Yuri Sos

- This model is for your personal use only and may not be sold or distributed in any way without team-ALCO's express written permission.

- A special sound set, AU_BogieFreight, has been installed into the Common.snd folder. This is a freeware sound set that is available on the steam4me site (**https://msts.steam4me.net/tips.html**) and is included for your convenience.

- The default.wag in the DEFAULT folder has been replaced with a new version to assist with correct coupling when shunting.
  The original default.wag has been renamed default.old.

- Depending on your install option, you may have chosen the default lighting system or the improved **LightFx** lighting by Robert Fontaine.

  Visit **https://msts.steam4me.net/tutorials/light_glow.html** for full details on this lighting enhancement.

  Please note that this is a global lighting effect. Lights not converted will appear to be much larger if you have installed the **LightFx** enhancement. However most Australian freeware releases on the steam4me site at **https://msts.steam4me.net/** are fitted with the **LightFx** enhancement.

  To change between the lighting systems, simply run the installer again.

---

2. Registration

You do not need to register this product to enjoy it.

---

3. Installation Notes

You have successfully installed these wagons into your Train Simulator game.
They are located in the following folders:
